As a young person, from time to time you may experience some sort of emotional difficulty and might feel you are alone, but you're not. It can be very difficult to talk about your feelings and what's happening in your life.

You may feel sad or confused; you may be experiencing loss or even questioning your sexuality. Whatever the issue, we all need help from other people at times.

You can ask to speak to a nurse in confidence at any time. We are here to help you. There is also a very good web site at
<http://www.wheresyourheadat.co.uk/teenagers/>
Which is an NHS supported site
